

EVA-9-11 AUTOMATIC VACUUM PACKING AND SHRINK LINE

Tecnotrip automatic line: EVA-9-11 + RET-A-4/11 + PA-9-11

AUTOMATIC LINE

PACKING + SHRINKING

PRE-FEEDER

LARGE PRODUCTION

DESCRIPTION

Automatic vacuum packing and shrink line made up of the PA-9-11 pre-feeder, the EVA-9-11 chamber vacuum packer (U/E version) and an RET-A-4 or RET-A-4-11 automatic shrink tank, designed for large production runs of bulky products.

The operator places the bagged products on the pre-feeder belt; automatic levelling of the two belts makes them move smoothly. A lifting system on the packer's internal belt brings the products into the chamber, correctly positioned for packing.

At the push of a button, the EVA-9-11 closes the lid, vacuums and seals, and ejects the product automatically. A sensor at the tank inlet detects each pack and starts the shrink cycle: infeed, hot water immersion, draining and outfeed. The TSA bag dryer can be fitted at the tank outlet so packs go straight to weighing and labelling.

CONSTRUCTION AND STANDARD EQUIPMENT

- Packing: Vacuum, sealing and vacuum + gas (MAP).
- Power supply: 220/380 V · 50/60 Hz · three-phase (all units).
- Compressed air: 6 bar.
- Dryer (optional): TSA bag dryer at the tank outlet.

KEY DATA

Packer	EVA-9-11	Tank	RET-A-4 / 4-11	Packer cycles	2-3/min
Tank cycles	5-7/min	Length	4275 mm	Air	6 bar

MODELS AND DIMENSIONS

REF.	CONFIGURATION	DIMENSIONS (MM)	SUITABLE FOR
PA-9-11	Pre-feeder	1165 × 770 × 1240	EVA-9-11 line
EVA-9-11	Vacuum packer (U/E)	1455 × 940 × 1135	EVA-9-11 line
RET-A-4	Shrink tank · 200 L	1730 × 930 × 1590	EVA-9-11 line
RET-A-4-11	Shrink tank · 300 L	On request	EVA-9-11 line

Dimensions of each unit according to Tecnotrip data sheets. Line configuration on request.

APPLICATIONS

Slaughterhouses, cutting rooms and cured sausage and fish factories with large production runs of bulky products.
